INTEGRATED PRODUCTION FOR INDIVIDUAL
RELEASE LINER SOLUTIONS.

Printed on W70706 E-PHOTO® Lustre 260 D – a brand of the Felix Schoeller Group.
Version April 2017

ABOUT THE FELIX SCHOELLER GROUP

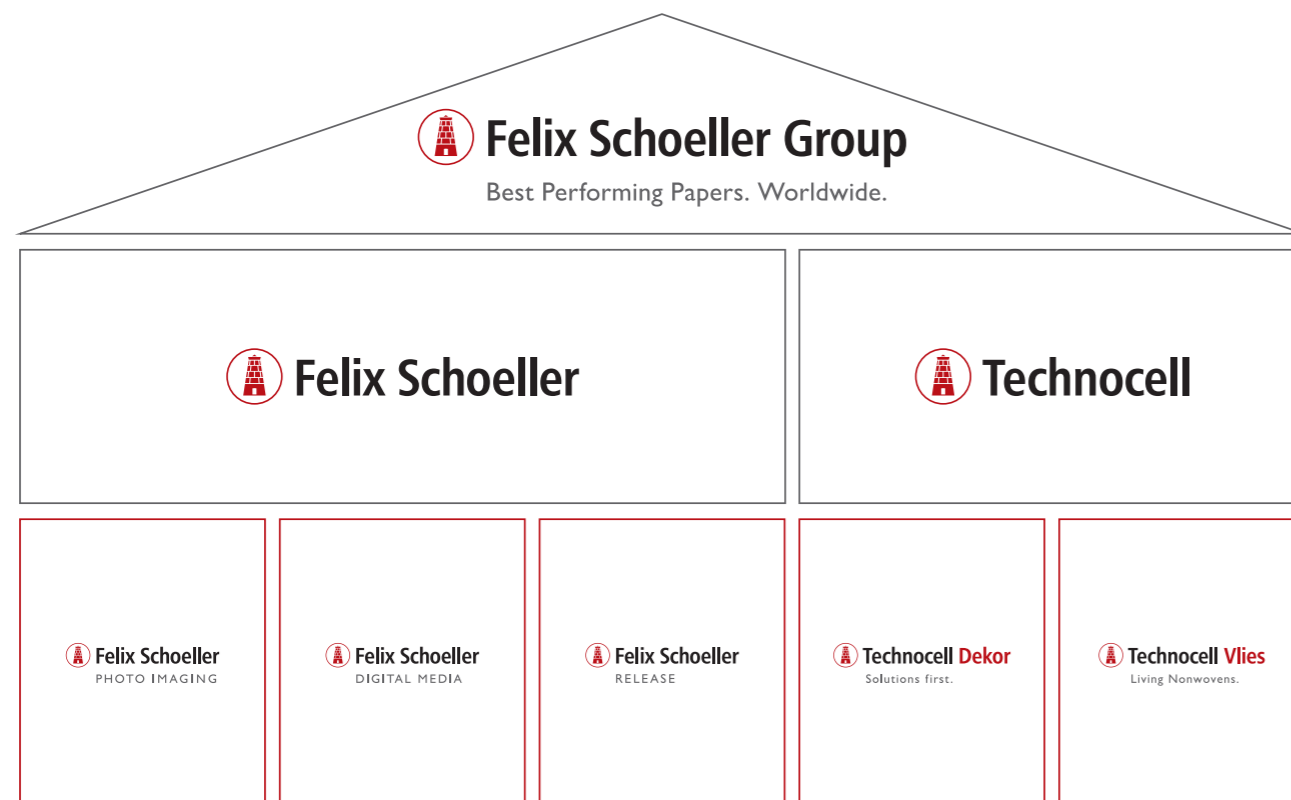

BEST PERFORMING PAPERS. WORLDWIDE.

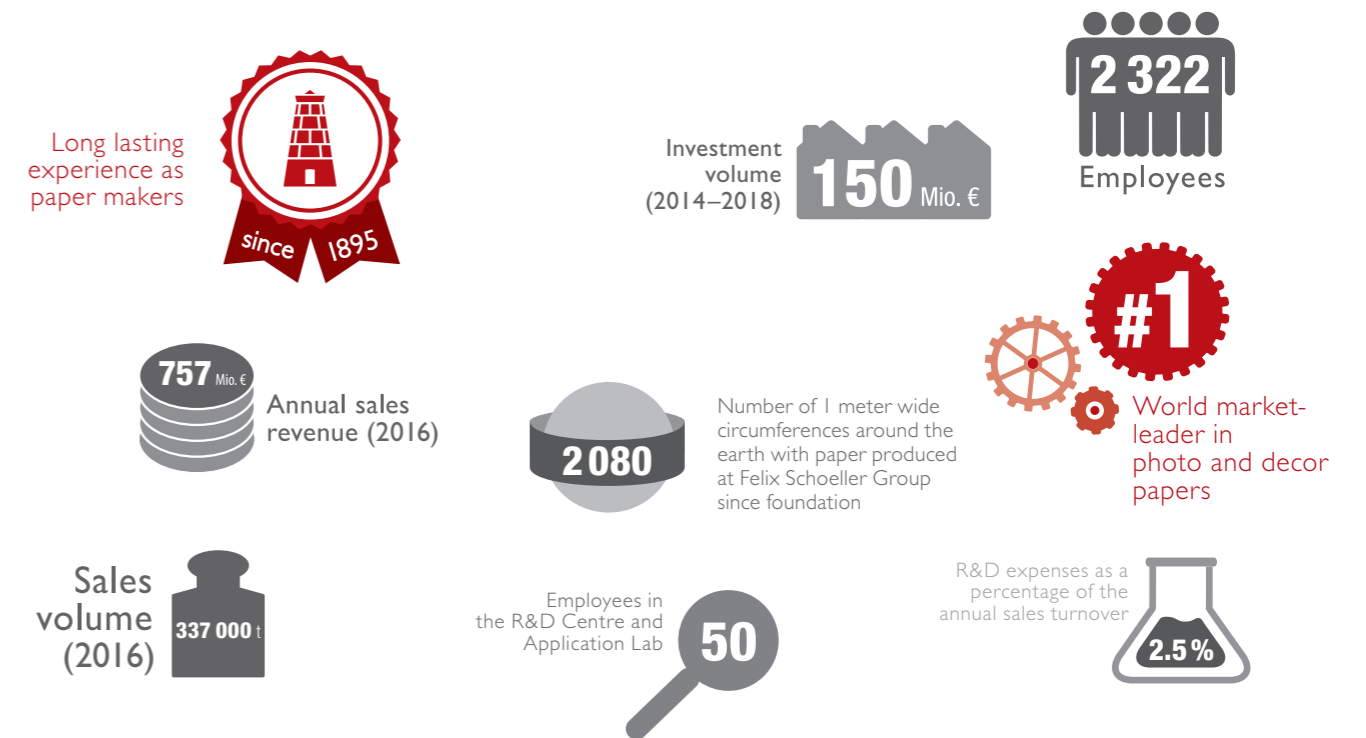

We are paper makers and paper refiners. We use the very latest technology to produce high-quality carrier materials and surfaces for visual communication. Our products serve our customers as the basis for the highest degree of creativity and freedom in the creation of their messages and contents, pictures and designs. We are a family-owned business with many years of tradition, German roots and an international orientation. We are proud of our independence, and in order to guarantee it, the top priority for us is lasting profitability.

COMPANY STRUCTURE

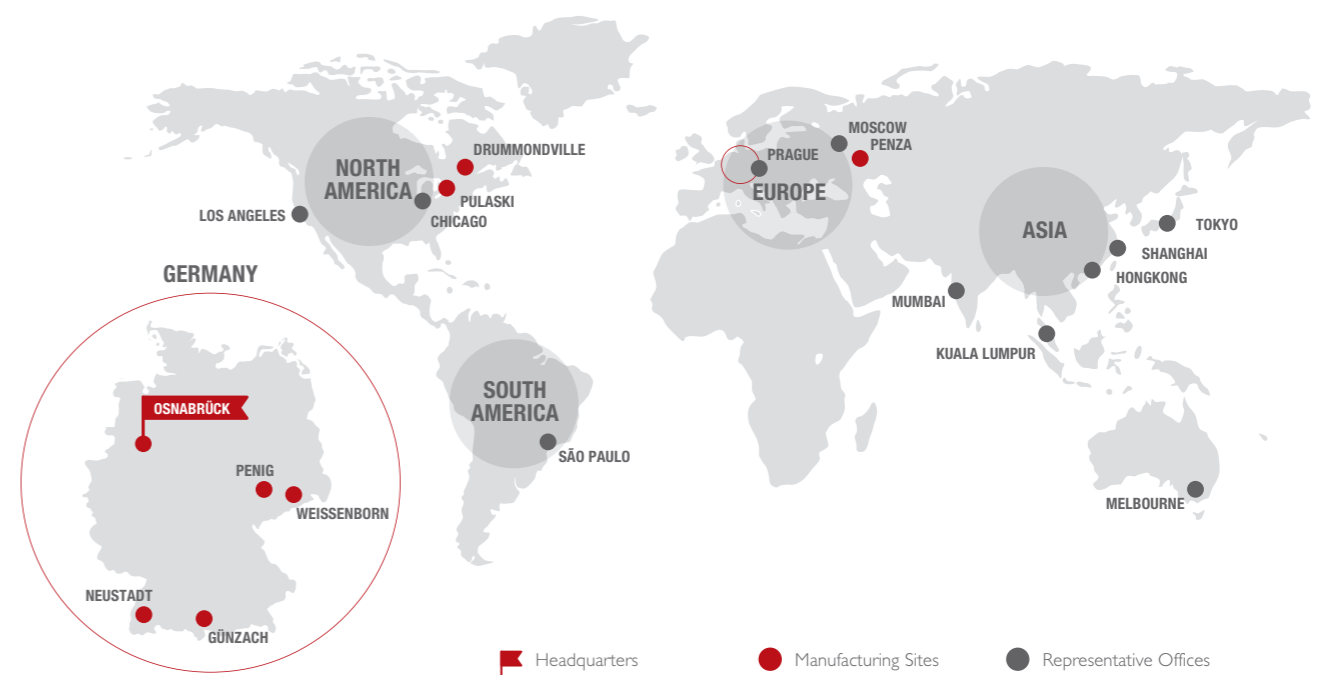

Paper is one of the most versatile materials in the world. Its properties are intriguing, and its qualities keep unfolding in more and more new areas of application. With all these opportunities and possibilities, we are also changing as a company and together with our customers we are creating new solutions. We currently have 5 independent business units under the roof of the Felix Schoeller Group.

KEY FACTS AT A GLANCE

FAMILY-OWNED COMPANY AND GLOBAL PLAYER

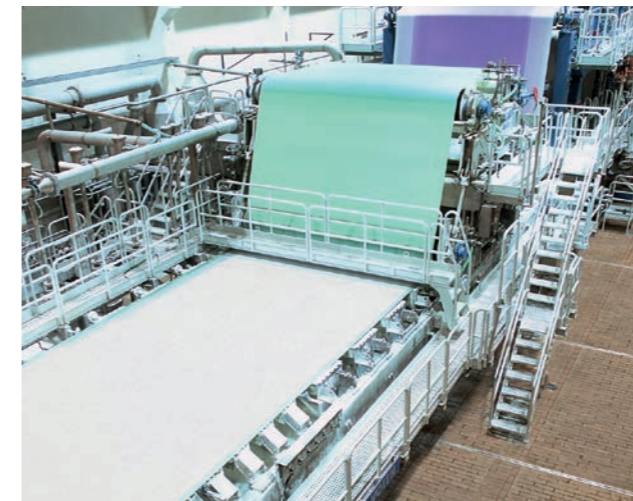

UNIQUE MANUFACTURING CAPABILITIES

For over 115 years, the name Felix Schoeller has been synonymous with outstanding expertise in manufacturing papers with high dimensional stability. Whether conventional photographic base paper or release liners, we set standards across the industry when it comes to products with top-class lay-flat properties. We carefully combine this know-how with our extrusion and silicone coating capacities to produce high-performance release liners for adhesive products.

Felix Schoeller offers a unique integration of all the production steps necessary to design and manufacture a polycoated kraft release liner. Explore the technical capabilities we have at our worldwide manufacturing operations: Five in Germany, two in North America and one in Russia.

INTEGRATED PRODUCTION

WORLDWIDE MANUFACTURING OPERATIONS

1. BASE PAPER PRODUCTION

- › 10 paper machines with a capacity of 400000 tonnes
- › Basis weights from 30 to 300 g/m² (18 to 185 lbs/ream)
- › Full color range from bright white to dark colors
- › High dimensional stability
- › Excellent surface characteristics
- › Superior cleanliness
- › Excellent profiles

2. EXTRUSION COATING

- › 6 extrusion lines with a capacity in excess of 800 million m²
- › Tandem extrusion
- › In-line logo printing
- › In-line functional coatings
- › Up to 1.92m/76"
- › Wide range of polymers
- › 100% in-line surface inspection

3. SILICONE COATING

- › Coating in-line on extruder
- › Solventless, Platinum System
- › 1 and 2 side silicone coatings
- › Full range of release values
- › Up to 1.92m/76"
- › Large range of basis weights and polymers
- › Logo printing, perforation
- › Slitting and rewinding

„Our release liners are as diverse as your applications.“

GRAPHIC ARTS

1. Exceptional surface smoothness
2. Excellent dimensional stability and layflat performance
3. Outstanding low level of silicone extractables

TAPE

1. Balanced surface smoothness
2. Optimized layflat performance
3. Constant release differential

INDUSTRIAL

1. Stable release differential
2. Excellent surface smoothness
3. Silicone free release liner solutions

MEDICAL

1. Various base layers available
2. Constant cleanliness of base layer
3. In compliance with required cleanliness standards
